Chapter – 1

- How many windows are present in SAS and purpose of all windows?
- How to display SAS dataset properties in output window.
- What are the rules of SAS dataset or SAS file name.
- What is description portion and data portion?
- What is the SAS terminology for table, column and row.
- What is the meaning of datatype and how many data type is available in SAS.
- Define 3 way to display property portion.
- What is the Magical data in SAS.
- What is the process to read the date in SAS.

Practical questions

1. Create sasdataset called **City** using source dataset **sashelp.citiday**.

2. Create sasdataset called **Car_audi** using source dataset **sashelp.cars**, where select only **Audi** from **Make column**.

3. Create sasdataset called BMI using sashlp.class.Create a new column BMI.

(Hint: BMI = weight/(height * Height)*703)

4. Create 2 sasdataset Male and female using sashelp.class.

5. Define **lable** of the column **Name** as '**Student Name'** from sashelp.class and create new sasdataset **New_file**.

6. Read the data and covert as SAS dataset ABC and write same data in same format.

Name Salary

Ram $20,000

Sita $40,000

7. Read the data from **SASHELP** library filename **Demographics**. Using this dataset create New sasdataset **ABCD.** Select value **EMR** from **region** column.

Eduvercity (SAS) +91 8050922145 http://eduvercity.com

8. Read the data from SASHELP library filename **Retail**. Using this dataset create New sasdataset **XYZ.** Select from **Year** column **1980** data.

9. Read the data from SASHELP library filename **Zipcode**. Using this dataset create New sasdataset **ZIP.** Select **Holtsville** city data.

10. Create SAS dataset using simple list input where columns of table are Student ,test1, test2, test3, test4 .

A1237 3.8 3.7 3.2 3.9
A9361 2.9 3.0 3.6 3.5
B3051 4.0 3.8 3.9 4.0

11. Reading data using column input where columns are lastname fname ssn status.

Green Samual 888888888 Hourly
Brennon Carol 123456789 Salary
Wang Robert 999999999 Salary
Randolph Virginia 987654321 Salary

12. Reading data using formatted input where column name are acctnum date amount

007430980	1/15/2001	$1,003.59
102875430	1/17/2001	$672.05
332089920	1/19/2001	$702.77
034590060	1/19/2001	$1,209.61
